P/N MDV-20304035

SCBA Demand Valve – Positive Pressure

Válvula de demanda para ERA (presión positiva)

Lung-governed air supply (demand) valve for 300 bar positive-pressure SCBA sets. Delivers breathing air from the pressure reducer to the full face mask on inhalation while holding a slight positive pressure inside the mask. Supplied with medium-pressure hose and quick coupling.

KEY FEATURES

- Positive-pressure, lung-governed air supply
- Low breathing resistance (see table)
- Medium-pressure hose with quick coupling to the pressure reducer
- Spare / replacement part for the 300 bar SCBA range

PRODUCT

TECHNICAL SPECIFICATIONS

Part number	MDV-20304035
Type	Positive-pressure demand (air supply) valve
Exhalation resistance	< 700 Pa
Inhalation resistance	> 0 and < 500 Value as listed in OEM data; unit not stated
Static pressure	< 300 Value as listed in OEM data; unit not stated
Connection	Medium-pressure hose with quick coupling
Used with	MSC-30703xxx / MSC-30705xxx SCBA sets; full face masks MFM-10104646 / MFM-10104647

SCBA SPARE PART | POSITIVE PRESSURE | 300 BAR SCBA

Genuine OEM equivalent available on request. Confirm mask and SCBA compatibility with the set in service before ordering. Illustration for reference; appearance may vary.
