P/N MEE-30803001 · IMPA 330438

Emergency Escape Breathing Device (EEBD) – 15 min, 3.2 L

Equipo de respiración para escape de emergencia (EEBD) – 15 min, 3.2 L

Open-circuit compressed-air emergency escape breathing device with hood, for personnel escape from a compartment with a hazardous atmosphere, as required by SOLAS. 3.2 L alloy-steel cylinder at 210 bar with regulator and pressure gauge, hood with breathing hose, and carrying bag with harness strap.

KEY FEATURES

- Rated working duration ≥ 15 min
- 3.2 L alloy-steel cylinder, 210 bar, with regulator / pressure gauge
- Hood with clear viewing window and breathing hose
- Carrying bag with harness strap — carried hands-free until activated

PRODUCT

TECHNICAL SPECIFICATIONS

Part number	MEE-30803001 **Also: MEE-30806005**
OEM item code	30803001 **Also: 30806005**
IMPA	330438 (breathing device, emergency escape, 15 min)
Type	Open-circuit compressed-air EEBD with hood
Cylinder	Alloy steel, 3.2 L
Working pressure	210 bar
Working duration	≥ 15 min
Weight	≤ 8 kg
Components	Cylinder with regulator / pressure gauge; hood with breathing hose; carrying bag with harness strap
Regulation	SOLAS 1974, as amended
Approval	CCS type approval (per OEM data)
Limitations	For escape only. Not for fire fighting or entering oxygen-deficient tanks or voids
Variant	MEE-30806003 — MED (wheel mark), 3 L, ≤ 6.2 kg
Accessories	EEBD box MBX-11899012 / MBX-11899014; bracket MBR-11601520; refilling adapter MRA-30805003 / MRA-30805005

SOLAS 1974 | 15 MIN | 210 BAR | IMPA 330438

Genuine OEM equivalent available on request. Supplied with manual for use and maintenance. Illustration for reference; appearance may vary.
